VARNA

IMPACT ASSESSMENT | 2026

BARE NECESSITIES

IMPACT SCORECARD

An evidence-based assessment of sustainability impact, readiness and risk.

PREPARED BY

VARNA COLLECTIVE

ASSESSMENT PERIOD

SEPTEMBER 2026

FRAMEWORK

Meet Varna

Procurement needs more than good intentions.

Varna Collective is an **impact-led procurement infrastructure** enabling gobal hospitality businesses to decarbonize their **Scope 3 emissions** through curated sourcing, rigorous supplier assessments and verified impact measurement.

We've designed this as independent **evidence led assessment** to objectively assess the sustainability approach taken by our supplier partners so we can most accurately represent your brand to a global audience.

Our methodology combines globally recognized sustainability assessment principles with the realities of SMEs, emerging material innovators, craft producers and distributed supply chains in the context of the Global South.

NOTE: Your Verified Assessment Results will be showcased on your brand page, giving visitors a clear view of your impact.

"Make impact measurable.
Make claims credible.
Make better procurement possible.

This is not a certification. It is an evidence-based assessment of the information and documentation provided to Varna at the time of review.

The Approach

We assess three things.

01 **What you do.**

02 **How you manage it.**

03 **How well it stands up.**

50% Impact

The measurable sustainability value created through your products, operations and supply chain.

- **Environmental:** materials, carbon, water, circularity, pollution and packaging
- **Social:** livelihoods, gender, fair work, health and wellbeing
- **Governance:** legal compliance, ethics and responsible sourcing
- **Cultural*:** craft integrity, skill heritage and climate-vulnerable communities

30% Readiness

How mature your systems are for managing, measuring and communicating sustainability.

Policies → Actions → Results → Verified evidence

20% Risk

How reliable the underlying claims, data and operating practices are.

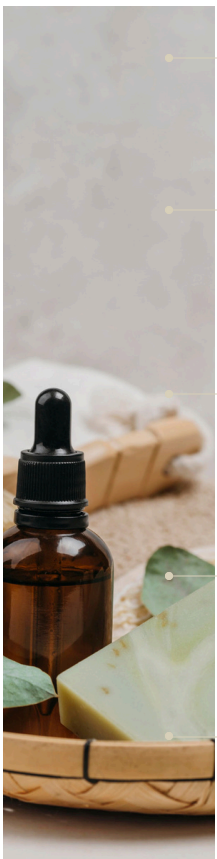

Regulatory compliance · Data reliability · Material risk

*Cultural Sustainability is assessed where relevant for businesses engaged in craft-led production. Where it is not applicable, Impact weighting is recalibrated across the remaining pillars.

How this assessment works

From evidence to score.

Every assessment begins with information supplied by the partner and is reviewed against a consistent set of criteria. Claims alone do not carry the same weight as documented or independently verified evidence

01

Information Submitted

Business information, product data, operating practices and sustainability claims.

02

Evidence Reviewed

Registrations, policies, certifications, bills, production data, photographs, videos and other supporting documentation.

03

Claims Cross-checked

Where applicable, information is checked against government registrations, certification bodies and recognised external sources.

04

Criteria Scored

Evidence is assessed across Impact, Readiness and Risk.

05

Weighted Score Calculated

Impact × 50% + Readiness × 30% + Risk × 20%

Not all evidence is equal.

Assertion	Documented	Verified
0.50x	0.75x	1.00x
Claim made with no supporting evidence.	Supplier records, photographs, production videos or internal data.	Independent, government or third-party evidence.

Bare Necessities

At a Glance

Bare Necessities is a Bengaluru-based, B Corp-certified personal and home care brand producing zero-waste bathroom amenities soaps, shampoos, conditioners, and moisturisers using naturally derived ingredients. The company manufactures through a women-run production team and positions itself around plastic-free, refillable, and compostable packaging formats across its retail and hospitality product lines.

PERSONAL CARE BRAND

Documents Assessed

01 **Legal & Registration Documents**

- Certificate of Incorporation
- DPIIT Startup Recognition
- GST Registration
- Import-Export Code (IEC)
- Udyam (MSME) Registration

02 **Certifications and Policies**

- PETA Certification / License Agreement
- Trade Licence (valid to Mar 2029)
- ISO 9001:2015 - renewed certificate
- ISO 14001 - renewed certificate
- ISO 45001- renewed certificate
- Supplier Code of Conduct
- Annual Impact Report 2026
- B Corp Certification
- Livelihood Report (2022)
- Women-Run Manufacturing Case Study (2022)

03 **Product and Operational Data**

- Full ingredient lists, all 4 SKUs
- Packaging weight (196g HDPE can)
- Moisturiser fill weight (30g)
- Facility electricity (~270 kWh/mo)

12+ documents & datasets reviewed
8 third-party sources/credentials verified
HIGH overall evidence confidence

Your Impact Score

74.3 /100

Advanced

A broad certification base plus LCA-verified carbon performance place UKHI at the top of the current portfolio.

Impact Pillar Breakdown

Environmental

31.8/100

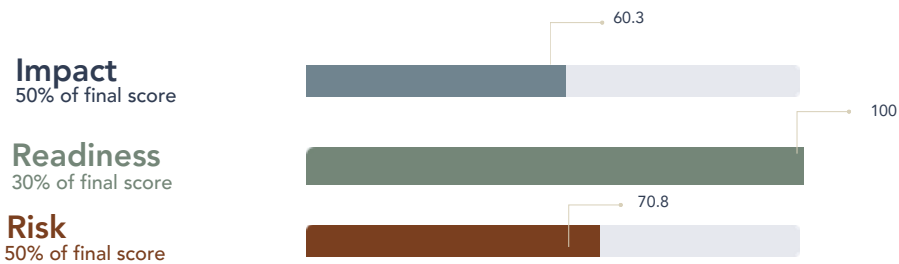

Social

63.8 /100

Governance

85.3 /100

Three weighted ingredients combine into one score

What Stands Out

01

Comprehensive certification portfolio

Governance is the strongest pillar, backed by B Corp certification, ISO 9001, ISO 14001, ISO 45001, and Cosmetic GMP (ISO 22716), together with clean GST and Udyam standing, no active legal proceedings, and named vendor categories and locations documented for 18 supply partners via Bare's 2022 Livelihood Report.

GOVERNANCE · 85.3

02

Strong social signal, thin verification

An 83% female workforce and women-led ownership are genuine strengths, but the exact wage-to-minimum-wage ratio and ESI enrolment status were not confirmed with supporting documentation.

SOCIAL · 63.8

03

Product-level environmental data not yet available

Carbon footprint, material composition, and water usage were not provided at the product level, so these criteria default to the framework's no-data scoring bands — this reflects an evidence gap, not an assumption of poor practice.

ENVIRONMENTAL · 31.8

Limitations of this assessment

This assessment reflects only the evidence Bare Necessities has shared with Varna to date. Product-level carbon, material composition, and water data have not yet been received; scores in these areas will be revised once that evidence is available.

Thank you for trusting us with your data.

Every credible assessment begins with evidence.

Thank you for providing the documentation necessary to assess your impact honestly and rigorously. We have used your data to build a clear picture of your current standing—recognizing your progress while noting where additional evidence could strengthen your score.

Questions about your assessment?

We are happy to discuss the details, our methodology, or any additional information you wish to provide.
