IMPACT ASSESSMENT | 2026

KHEONI

IMPACT SCORECARD

An evidence-based assessment of
sustainability impact, readiness and risk.

ASSESSMENT PERIOD
SEPTEMBER 2026

PREPARED BY
VARNA COLLECTIVE

Meet Varna

Procurement needs more than good intentions.

Varna Collective is an **impact-led procurement infrastructure** enabling gobal hospitality businesses to decarbonize their **Scope 3 emissions** through curated sourcing, rigorous supplier assessments and verified impact measurement.

We've designed this as independent **evidence led assessment** to objectively assess the sustainability approach taken by our supplier partners so we can most accurately represent your brand to a global audience.

Our methodology combines globally recognized sustainability assessment principles with the realities of SMEs, emerging material innovators, craft producers and distributed supply chains in the context of the Global South.

NOTE: Your Verified Assessment Results will be showcased on your brand page, giving visitors a clear view of your impact.

"Make impact measurable.
Make claims credible.
Make better procurement possible.

This is not a certification. It is an evidence-based assessment of the information and documentation provided to Varna at the time of review.

The Approach

We assess three things.

01 **What you do.**

02 **How you manage it.**

03 **How well it stands up.**

50% Impact

The measurable sustainability value created through your products, operations and supply chain.

- **Environmental:** materials, carbon, water, circularity, pollution and packaging
- **Social:** livelihoods, gender, fair work, health and wellbeing
- **Governance:** legal compliance, ethics and responsible sourcing
- **Cultural*:** craft integrity, skill heritage and climate-vulnerable communities

30% Readiness

How mature your systems are for managing, measuring and communicating sustainability.

Policies → Actions → Results → Verified evidence

20% Risk

How reliable the underlying claims, data and operating practices are.

Regulatory compliance · Data reliability · Material risk

*Cultural Sustainability is assessed where relevant for businesses engaged in craft-led production. Where it is not applicable, Impact weighting is recalibrated across the remaining pillars.

How this assessment works

From evidence to score.

Every assessment begins with information supplied by the partner and is reviewed against a consistent set of criteria. Claims alone do not carry the same weight as documented or independently verified evidence

01 Information Submitted

Business information, product data, operating practices and sustainability claims.

02 Evidence Reviewed

Registrations, policies, certifications, bills, production data, photographs, videos and other supporting documentation.

03 Claims Cross-checked

Where applicable, information is checked against government registrations, certification bodies and recognised external sources.

04 Criteria Scored

Evidence is assessed across Impact, Readiness and Risk.

05 Weighted Score Calculated

Impact × 50% + Readiness × 30% + Risk × 20%

Not all evidence is equal.

Assertion	Documented	Verified
0.50x	0.75x	1.00x
Claim made with no supporting evidence.	Supplier records, photographs, production videos or internal data.	Independent, government or third-party evidence.

Kheoni

At a Glance

Kheoni Ventures Pvt Ltd is an Indore-based organic skincare and wellness brand producing face, body, and hair care products using clean, nature-inspired formulations free from parabens and sulfates. Products are handcrafted in small batches through partnerships with tribal communities in central India, grown out of a local forest conservation initiative, and packaged using reclaimed wood and paper.

PERSONAL CARE BRAND

Documents Assessed

01

Legal & Registration Documents

- GST Registration
- Udyam (MSME) Registration
- (No Certificate of Incorporation, DPIIT recognition, or Import-Export Code on file yet)

02

Certifications and Policies

- No certifications or policy documents currently on file

03

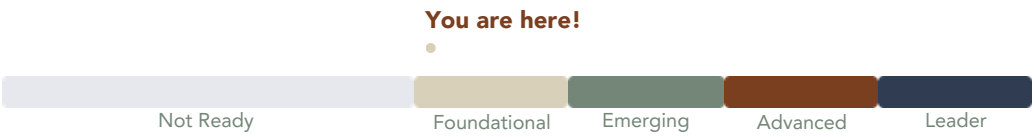

Product and Operational Data

- Full ingredient lists, all 20 SKUs
- Product names and unit weights
- (Composition %, packaging weight, and facility electricity not yet shared)

2 documents & datasets reviewed
0 third-party sources/credentials verified
LOW overall evidence confidence

Your Impact Score

51.3 /100

Foundational

A thin registration and certification file, combined with unverified environmental data, currently holds Kheoni in the Foundational band.

Impact Pillar Breakdown

Environmental

25.4/100

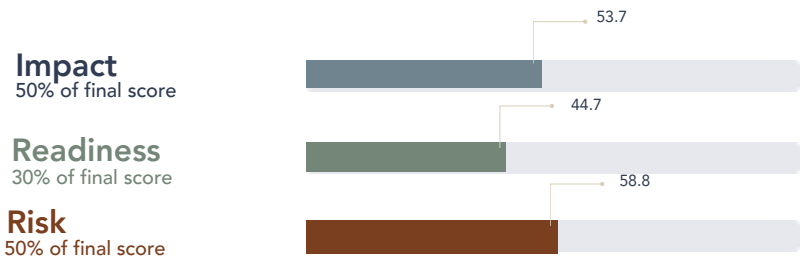

Social

59.1 /100

Governance

76.5 /100

Three weighted ingredients combine into one score

What Stands Out

01

Governance holds up despite a thin registration file

Governance is Kheoni's strongest pillar even though only GST Registration and Udyam (MSME) Registration are currently on file -no Certificate of Incorporation, DPIIT recognition, or Import-Export Code has been shared, and no B Corp or ISO certifications are on record.

GOVERNANCE · 76.5

02

Social score not yet backed by documentation

Kheoni's Social pillar sits mid-range, but Varna does not currently hold supporting documentation — workforce composition, wage data, or statutory enrolment — for this score, so it should be read as provisional rather than verified.

SOCIAL · 59.1

03

Environmental remains the weakest, least-evidenced pillar

No packaging weight, ingredient composition percentage, or facility electricity data has been shared. Carbon modeling using ingredient lists alone has previously shown Kheoni's footprint running higher than conventional equivalents for ingredient-heavy SKUs — this is both an evidence gap and a genuine risk area, not just a scoring artifact.

ENVIRONMENTAL · 25.4

Limitations of this assessment

This assessment reflects only the evidence Kheoni has shared with Varna to date. Legal registration documents beyond GST/Udyam, and all product-level environmental data, have not yet been received; scores in these areas will be revised once that evidence is available.

Thank you for trusting us with your data.

Every credible assessment begins with evidence.

Thank you for providing the documentation necessary to assess your impact honestly and rigorously. We have used your data to build a clear picture of your current standing-recognizing your progress while noting where additional evidence could strengthen your score.

Questions about your assessment?

We are happy to discuss the details, our methodology, or any additional information you wish to provide.
